METHODOLOGY OF TEACHING

IN-HOUSE MATERIAL

We do not use text books on any of our courses. All of our material is created and developed in-house by expert and experienced lecturers. Our expert tutors have used their knowledge and experience to create tailor-made materials for all of the courses. Guaranteeing an experience which is unique and most importantly beneficial for learners. Text books are created for a general audience. We have found in our experience that they seem like they are either made by someone who has never been in a classroom or has not been in one for a while. On the other hand, our material is engaging and relevant.

SMALL CLASS SIZES

Our class sizes do not exceed 12 students to optimise the learning in class and the attention the students get from their respective tutors. Therefore, optimising the learning experience for every single individual. This is also the perfect number as the tutor has the option to do pair work, groups of 3, 4 or 6!

OPTIMISED DURATION OF LESSON

The duration of our sessions are 45-60 minutes ensuring engagement and maximum concentration. This is to ensure the learner is able to employ maximum levels of concentration and to avoid the sessions becoming laborious. This is in line with research done by psychologists about attention span and the successful education framework set by likes of Finland.

NATIVE SPEAKERS

All our trainers and tutors are native speakers and possess a related MA. They are primarily from the UK. With qualifications and experience from prestigious British such as King's College London, Cranfield University and De Montfort University.
